FINANCIAL AND COMMERCIAL.

MONDAY, March 23—6 P. M.

To-day's bank statement compares as follows

that of last week:

Bank ending. Losses. Specie. Circulation. Deposits.

March 14 \$17,577,375,949 36,119,083 8,657,016 122,244,934

March 21 17,523,824,739 33,955,122 8,609,722 107,044,468

Decrease, \$4,046,470 2,154,963 47,393 5,939,568

This statement, like the last, reflects the effect of the recent legislation of Congress and the proposed measures of the Legislature on the subject of gold and exchange. The deposits which appear upon the above statement to have been withdrawn during the past week consisted partly of gold and exchange, on which, as it seems, some \$4,000,000 had been loaned by the banks, and partly of legal tender notes paid into the Sub-Treasury. These loans have been called in, the bid and bills thrown upon the market, and the banks placed in a position not only more conservative so far as their own interests are concerned, but more reputable for their stockholders and officers. They still hold nearly thirty-four millions of gold, of which we judge that some thirteen millions do not belong to them. This sum, or the bulk of it, will come on the market as fast as it can be sold. This bank statement helps to explain the halting condition of the gold market last week, and likewise presages a diversion of speculation from old and exchange to other commodities.

Money grows steadily easier. To-day the brokers are freely supplied with money at 5 per cent on call, and no one in Wall street is paying over 6 per cent. Money cannot well fall much below 5 per cent so long as the government allows 5 per cent for temporary deposits. Still, as the deposits with the Sub-Treasury are only on call after ten days' notice, loans in Wall street on demand, without previous notice, are likely to rule a fraction lower. The payment by government of the maturing certificates of indebtedness is steadily increasing the volume of currency about, and will naturally continue to do so for the present. Debt certificates were quoted this morning at 97% a for the old issue, and 97% a for the new issue. Commercial paper of the highest grade sells at 5 a 6 per cent. It is announced from Washington that so long as the 5-20 bonds sell the Secretary will no other loan.

There was a further fall in gold-to-day, but without much excitement in the market. The volume of speculation in gold has been very much reduced of late, and neither buyers nor sellers seem disposed to move with vigor in it. It opened at 154, dropped to 152%, sold at 151%, 151, 151% and 151% in the afternoon, and closed 151% bid. Exchange was inactive to-day. The leading drawers asked 169; but we heard of no transactions above 168%, and in the afternoon good bills were sold at 168, and even lower. The active purchases of American securities which are going on for European account furnish an amount of exchange which goes a long way to meet the wants of importers.

The stock market opened this morning with unusual vivacity. When Pacific Mail, Erie and some of the Western shares were struck the excitement was very great. Most of the commission brokers had orders to execute, and, though some of the bears continued to offer their options, the supply of stock soon proved insufficient to meet the demand, and prices advanced in consequence. At the first board Erie rose 1, Pacific Mail 4, Pittsburgh 5%, Galena 1, Rock Island 5%, Toledo 5%. Governments were very strong indeed. The 130 notes were in demand at an advance of 1 per cent; those of 1881 were likewise 5% per cent higher. For bonds the inquiry was active and prices were firm. Altogether the market presented an active and buoyant appearance, and closed with an upward tendency. At the one P. M. board the market was very steady indeed at the prices of the morning board. At the second board the market continued very firm, and the highest prices of the morning were maintained. The Central American stock, representing the new Nicaragua Transit Route, is now quoted regularly at the board, and shows some activity. It sold to-day at 54 a 56. At the 4 P. M. call the market continued strong, and the highest prices of the day were maintained.

The following were the closing quotations of the day:
